Chinese ●●●●●○○

SOFT SKILLS

- Organized
- Pragmatic
- Empathetic
- Critical thinking
- Adaptability

PROFILE

Currently in the final phase of my apprenticeship in backend development with a particular mastery of Java/Spring Boot and React, I am a passionate full-stack developer, with a preference for frontend.

Applied and enthusiastic, I solve problems with ease. A decade of international living in China and the United States has strengthened my adaptability, independence and communication skills. I am seeking a stimulating professional environment that combines communication and problem-solving on a daily basis.

EDUCATION

2022-2024 Back-End Programming - Java (Bachelor)
OPENCLASSROOMS
Alternance chez Mutuelle Générale des Affaires Sociales

2021-2022 Front-End Web Developement (Bachelor)
OPENCLASSROOMS

React Data Table Component Library

Coded in React, compiled with Vite, and thoroughly tested, documented, and published on NPM. It includes features such as sorting (asc/desc), pagination, data filtering, and search functionality. The choice of a light/dark theme, row selection(s), and the ability to retrieve the index make this library a convenient and versatile component to use.

Medilabo Solution

A fullstack API Gateway with a microservice architecture. It employs Docker to containerize a Mongo database and the backend microservices build in Java Spring boot.

2020- Responsive Web Design

2021- JavaScript Algorithms and Data Structures
CERTIFICATS FREECODECAMP

2014- 2016 Master Littérature Française
University of Oregon
